Do you want to watch your favorite DVD movies on your iPod? It's extremely easy to do that, as long as you use our solution. **Alive DVD to iPod Converter** is the best dvd-to-ipod solution you can find. It's an excellent and powerful DVD software to convert all of your DVDs to iPod MP4 video format, which is completely supported by Apple iPod (including iPod Classic, iPod Touch, iPod Video, iPod Nano, etc.). Our great program provides a complete and easy way for you to convert DVD to iPod format with highest conversion speed and super high quality video and audio.

Alive DVD to iPod Converter supports both MPEG-4 and H.264 video codecs in MP4 format. Especially H.264 format, it offers better video quality in same file size compared with MPEG-4. This superb feature lets iPod users enjoy their DVD movie(s) on iPod with excellent quality beyond compare. With our extremely easy-to-use interface, you will be able to trim the length of any video title and convert any part of your favorite clips inside the DVD. In addition, Alive DVD to iPod Converter gives you the ability to convert video titles in batch and convert more than one video titles in one time. If you want, our considerate program will automatically shut down your PC after the conversion has been done. Finally, all output settings are adjustable, including width*height, bitrate (video quality) and frame rate.

New features

Trim the length of DVD title

This feature allows you to convert only a part of your favorite DVD title. If you don't want to waste time to convert the whole title, just click "Trim" button to set the length for your favorite clips.

Preview video title

You are able to preview the video clips before you start to rip.

Rename output file name

The default file name is TitleXX (XX:XX:XX), for example "Title01 (02:16:50)". Now you can edit it and input any name you like.
