If you are an iPod owner, you will love **Moyea DVD to iPod Converter**, because it gives you an easy solution to enjoy more out of your iPod. With this program, you can convert any DVDs to MP4, MOV, M4V, MP3, M4A, WAV, which can be added to iTunes and sync to iPod, iPod Touch, iPod Nano, iPod Classic etc. for playback everywhere you want.

Meanwhile, this iPod converter supports a set of customization options, like trim, crop, watermark, effect, audio replacement. With them, you can edit the original DVD videos in any way you like.

Key Features

Faster DVD conversion speed

Because of its multi-thread encoding technology, the iPod converter will detect whether you are using a 2 core CPU or multi-core CPU automatically, so as to multi-thread convert videos with same size at a 2 times faster speed, comparing to other similar iPod converters.

Advanced audio and video sync technology

After using the iPod converter, you will find the output video files are never be troubled by audio and video sync issue. Thanks to the advanced audio and video sync technology adopted by the iPod converter.

Green codec environment

The program will give you a green codec environment. It will never install any codec on your computer, since its built-in codec helps to play various video formats. With its built-in codec, you can avoid the unexpected codec problem.

Input and output preview windows

There are two preview windows under the Editor section: Input preview and output preview. With them, you can easily find the editing effect after you do some editing actions. It is convenient for you to do the accurate customizations for your DVD.

Trim and crop DVD clips

The Trim function enables you to get the wanted videos length, while with Crop, you can cut off any video area to cater for you need.

Merge/Join multiple DVD clips into one for conversion

Check the option "Merge into one file", you can merge/join multiple selected titles/chapters into one file for conversion.

Add different watermarks

Under the Editor section, you can add different watermark for your DVD clips. It allows you to add logo, text, image (including GIF), and video watermarks. Its video watermark will add a picture-in-picture effect on the DVD videos.

Various special effects and deinterlacing

You can also add various special effects like simple gauss blur effect, simple laplacian sharpen, gray, flip color, invert, aged film on your DVD clips. Moreover, you can also check the option Deinterlacing to convert interlaced video into a non-interlaced form, so that you enjoy a better and clearer video effect after conversion.
