Advanced audio and video sync technology

The program adopted advanced audio and video sync technology; never let you troubled by the audio and video issues.

Deinterlacing

The program supports deinterlacing, which can convert interlaced video into a non-interlaced form, so that you enjoy a better and clearer video effect. Besides, it also allow you to add special effects like simple gauss blur effect, simple laplacian sharpen, gray, flip color, invert, aged film.

Trim video

You can trim the video to get your favorite video duration.

Crop video

Crop the video by dragging the dashed frame on the video screen to remove the unwanted parts?

Watermark editing

This program enables you to edit text watermark, image watermark and video watermark so as to help you to add logo, comments, animations and other video to your DVD movies and videos.

Save attractive images

You can capture beautiful images from the videos by clicking on snapshot button.

Merge video files into one

This program allows you merge multiple video clips into one without any interruptions.

Built-in codec

This program has its own built-in codec. So it will not install any other codec on your computer, which can avoid the unexpected codec problem.
