Photo DVD Maker Pro. features a simple drag-and-drop interface, a generous amount of special features and excellent output options. The program divides slide show creation into three general tasks: Organize Photos, Choose Menus and Burn Disc. Within each task are more detailed refinements, such as image transitions, background music, stylized text, clip art and even the ability to add video clips to your slide shows. The program supports video files in MPEG, AVI, MP4, VOB, MOV, FLV, ASF and WMV formats.

The variable formats of the output of slide show makes this program easily outshines the competition: Photo DVD Maker slide shows can be burned to DVD or VCD for watching on TV, transferred to iPod, PSP, mobile phones, uploaded to YouTube and MySpace, and saved in FLV, MPEG and AVI video formats. Unlike many other slide show makers in its price range, Photo DVD Maker also supports dual-layer DVDs and Blu-ray discs.

Key Features

Easily create photo slideshow DVD for watching on TV
