Key Features

The input and output formats supported by TOP DVD to PSP Suite

- Support the input formats of DVD, WMV, AVI, MPEG, MOV, DAT, MP4, VOB, 3GP, RM, RMVB and FLV.
- Support the output formats of PSP MP3, PSP MPEG-4 and PSP AVC PS3 MPEG-4.

The output devices supported by TOP DVD to PSP Suite

- Support the output devices of PSP and PS3 devices.

Preview files

- With the help of the suite, you can preview the input files before conversion to get a clear idea of the converted effect, select your favorite segments and check the correctness of the files.

Automatically shut down the computer

- You can leave your computer at any time even in the process of conversion, because the computer can be automatically shut down after conversion finished.

Freely customize parameters

- You can customize the output parameters like audio channel, audio quality, video quality and video size to get the output effect you like most.
- The output effect can be more suitable for your PSP players.

Clip segments

- You can click the "clip" button to clip any segment of the files, and the clipping length can be determined by setting "Begin Time" and "End Time".

Support batch conversion

- With a powerful conversion engine, multiple files can be converted in batches at a time, which will definitely save much of your time.
- All the work can be done only by one click.

Capture images in previewing

- If you like some images in previewing, you can capture them by a snapshot and save them in BMP format.
