All My Movies™ is a personal movie database and intended for those who are tired of managing their movie collection manually or using difficult-to-use software programs. It is an easy-to-use DVD catalog program. You can use it to catalogue your personal collection of video files (AVI, MKV and other) Blu-rays, DVDs, CDs, VHS tapes, etc... You do not need to type all movie details; All My Movies™ will download all the details from the internet movie database automatically!

All My Movies™ is really a multilingual movie organizer application. It now supports English, Russian, Greek, Dutch, French, Belorussian, Latvian, Polish, Serbian, Italian, Portuguese, Finnish, Swedish, Spanish, Korean, Danish, Chinese, Slovak and German languages. You can help us to translate it to your native language!

All My Movies™ is the best movie organizer available for a movie collector. Make your own movie catalog today! The program is Vista and Windows 7 compatible. You can catalog your Blu-ray and HD DVD discs with All My Movies™ too!

Key Features

- Easily import movie details from internet movie databases available in various languages. Additional internet movie databases are supported with the plugins for All My Movies
- Extended cast details. Automatic lookup for actor photos, birthdays, filmography and biography.
- TV Series support. Auto filling episode title and descriptions.
- Ability to print collection using any existing report. Or you can create your own report with the built-in report editor.
- Ability to add DVD/Blu-ray using UPC/EAN barcodes. Just enter (or scan with a special scanner) barcode numbers and All My Movies™ downloads all the rest of the information automatically. Cheap CueCat barcode scanners are fully supported.
- Large cover image and movie posters import from internet databases like Amazon.com and DVDEmpire.com
- Ability to save your collection to mobile devices like PDA or smartphone
- Supports DACAL DC-300 CD Library II device
- Able to generate images with movie details for several hardware media players like Tvix or Dune
- Ability to play movies directly from the program. Can be used as video playlister
- Third party plug-ins supported. There are plugins for movie details import from Ant Movie Catalog and MovieTrack software
- Import DVD/Blu-ray catalog from other formats (CSV text format, MS Excel files and AMC (Ant Movie Catalog) files). Easy migrating
- Clear overview of your video inventory with nice collection statistics
- Skinnable user interface. You can use standard Windows XP themes as skins
- Capture stills directly from DVDs or AVI files and add them to the movie database to help you remember the movie.
- Fast movie search using any of the database fields - title, director, year, cast of movie, genre, description, movie synopsis, etc
- Export your video collection to PDF, HTML (several templates are available or you can create your own) , plain text, CHM or Microsoft Excel format, so you can place it on your home web page or import into some other software
- Password protect your movie database
- Network mode, so, you can share your database in your home network and access it from several computers simultaneously.
- An easy way to share your movie database with friends. Impress them!
- MediaInfo.DLL support for reading technical details from video files
- Multilevel automatic backup option - you will never lose your collection!
- Easy to use loan manager

System Requirements

All My Movies™ requires a PC with Windows XP/Vista/7 to run. It has no additional requirements.
