Key Features

Your Ultimate Blu-ray, HD & 3D Movie Experience on the PC

All-in-one Media Suite 9 includes PowerDVD 10, featuring leading video and audio technologies for enjoying Blu-ray Discs, DVDs and HD video files. On top of that, you can now use Media Suite to watch Blu-ray 3D movies, or even upgrade your DVDs and videos to 3D or HD using TrueTheater™ Technology.

TrueTheater™ Maximizes Your DVD Playback

PowerDVD 10 TrueTheater™ technology enhances your viewing pleasure:

- TrueTheater™ HD
- TrueTheater™ 3D
- TrueTheater™ Motion
- TrueTheater™ Stretch
- TrueTheater™ Lighting
- TrueTheater™ Surround

From Easy to Advanced Video Editing

CyberLink Media Suite 9 has something for all occasions when it comes to editing videos. MediaShow 5 offers a range of easy, often single-click features for editing videos fast. Meanwhile, PowerDirector 8 provides advanced features for creating more sophisticated video productions using a timeline editing environment.

High Performance HD Video Editing and Conversions

High-definition video places higher demands on your PC resources than standard definition content. That's why Media Suite 9 is optimized to handle HD video content and now includes software that lets you leverage the full power of your CPU and graphics hardware.

Fast Ways to Organize and Enhance Photos

Media Suite 9 includes the latest version of photo and video organizer MediaShow 5. With many new features just for photos, you can now sort by faces, improve image quality with one click, and create customized slideshows that you can share online or by burning to disc.

Audio Editing with WaveEditor

WaveEditor allows you to customize audio tracks and create ring tones for your mobile phone by applying special effects to your audio files. Crop and trim your audio files with great precision, have fun customizing your audio by changing the pitch and speed. With support for a wide range of formats, you can get the most out of your music and audio files.

Rip and Burn Audio Files with Power2Go

CyberLink Power2Go allows the extracting of audio tracks from video files and enables creation of Audio CDs from MP3s. MP3 ripping and file conversion tools let you create audio files for your portable media player. Audio features include:

- Ripping from CDs to MP3, WMA or WAV files
- Audio normalization between tracks
- Support for the Freedb info online database
- Support for inputting CD text
- Audio file converter
- Create music tracks from video files
- Audio CD burning
- Insert gaps between audio tracks

Ultra-Fast Conversions for Videos, Photos & Music

For the first time, CyberLink Media Suite 9 features MediaEspresso 6 - a powerful and lightning fast universal media converter. Not only does MediaEspresso offer batch and multithread conversions with optimization for Intel, NVIDIA and AMD technology, but it also comes with unique Smart Detect and Direct Sync features which makes converting and outputting media to your mobile devices a breeze!

Data Backup by Burning to Blu-ray Discs and DVDs

All-in-one Media Suite 9 offers a broad range of features for archiving and protecting your data files on Blu-ray Discs and DVDs.

PowerDirector's Video Editing Community

CyberLink's online community called DirectorZone is the perfect platform for sharing your interest in video editing and creation. There you'll find heaps of ways to improve your own video projects while helping others do the same.

PowerDVD's Easy Ways to Share Your Love of Movies

PowerDVD's online community called MoovieLive is a great place to share your passion for the Blu-ray Discs and DVDs you love AND loathe. To get started simply link directly from within Media Suite 9's version of PowerDVD 10.
